Basic Set Contents: (1) Catheter (1) Guidewire (1) Introducer Needle (1) Dilator (2) End Cap (1) Syringe

IMPORTANT RISK INFORMATION

Indications For Use: Duo-Jet® Double Lumen Catheter is indicated for use in attaining Short-Term vascular access for hemodialysis and apheresis. It may be inserted percutaneously and is primarily placed in the internal jugular vein of an adult patient. Alternate insertion sites include subclavian vein or femoral vein as required. The curved Duo-Jet® Double Lumen Catheter is intended for internal jugular vein insertion. This catheter is indicated for a duration less than (30) days. For femoral placement, monitor catheter condition closely.

Contraindications: This catheter is intended for Short-Term vascular access only and should not be used for any purpose other than indicated in these instructions.

Refer to Instructions for Use provided with the product for complete instructions, warnings, and contraindications. Observe all Instructions for Use prior to using products. Failure to do so may result in patient complications.
